Mustapha Musdhaliph Mofe

Business Automation and AI Implementation Specialist

mmusdhaliph@gmail.com | mofe-ai.vercel.app | linkedin.com/in/mustapha-musdhaliph

PROFESSIONAL SUMMARY

Business automation and AI implementation specialist with 4+ years of experience across software development, CRM operations, and workflow automation. Designs and ships production workflows for lead handling, customer support, reporting, and back-office processes using n8n, APIs, CRM platforms, and structured data. Pairs engineering skill with process design, building every system with validation, duplicate protection, human review, and error handling so automation stays reliable and under control.

CORE SKILLS

Automation and Process: Workflow design, process mapping, exception handling, cross-functional delivery

AI: AI agents, structured data extraction, OpenAI and GPT-based integrations

Integration and Data: API integration, data validation, duplicate protection, operational reporting

CRM: Salesforce, HubSpot, Zoho, CRM automation

PROFESSIONAL EXPERIENCE

Automation Specialist | Innovation Hub *2023 – Present*

- Designed and implemented workflows in n8n, Zapier, and Make across internal operations, sales, marketing, and customer support, saving teams an estimated 10–15 hours per week of manual work.
- Connected Telegram, Airtable, Notion, Google Sheets, and CRM platforms to automate data movement, handoffs, and recurring tasks.
- Developed AI-assisted onboarding and customer support systems, including chatbots and early-stage product implementations.
- Built operational dashboards and objective-tracking tools that improved visibility into team activity and performance, cutting weekly reporting effort by an estimated 4–6 hours.

Business Operations and Automation Specialist | Digital Planet Solutions *2022*

- Coordinated automation requirements and cross-functional delivery for marketing and internal operations across e-commerce and technology clients.
- Maintained HubSpot and Zoho CRM workflows covering lead handoffs, follow-ups, and customer segmentation, saving an estimated 6–8 hours per week of manual follow-up and data entry.
- Built workflows for influencer sourcing, email content generation, and social media scheduling on automation platforms.

Junior Software Engineer | Medical and Dental Council *2021 – 2022*

- Built booking systems and quote forms with JavaScript and APIs to support business processes.
- Developed responsive web interfaces, dashboards, and reporting features using JavaScript, TypeScript, and REST APIs.

SELECTED AUTOMATION PROJECTS

NovaCore Lead Handling | *n8n, Supabase, Salesforce, Apollo, OpenAI, Slack*

- Built an end-to-end website-enquiry workflow covering validation, company research, AI assessment, and Salesforce lead creation, reducing manual triage from about 15 minutes to under 2 minutes per lead.
- Added duplicate protection, fixed approval rules, Slack review for uncertain enquiries, and internal sales notifications.

Post Call Revenue Intelligence | *n8n, Supabase, Salesforce, OpenAI, Gmail, Slack*

- Archived sales-call transcripts, extracted commitments and deal concerns, matched Salesforce records, logged Tasks, and prepared Gmail follow-up drafts, saving an estimated 20–30 minutes per call.
- Kept sending under human control, with duplicate checks and error reporting.

Meeting Prep AI Agent | *n8n, Salesforce, Supabase, OpenAI, Slack*

- Built a Slack-based agent that researches recent CRM Tasks and past-call intelligence, with optional account contacts, open deals, and previous briefings, cutting prep from about 30 minutes to 5 minutes.
- Saves structured meeting briefs covering commitments, risks, questions, and knowledge gaps.

AP Invoice Investigation Agent | *n8n, Gmail, Google Drive, Supabase, OpenAI, Slack*

- Built invoice PDF intake, original-file archiving, AI extraction, and reference checks against vendor, purchase-order, and receipt records, saving about 10 minutes of manual checking per invoice.
- Applied fixed validation rules to separate technically validated invoices, duplicates, and review cases, without authorizing payment.

TOOLS AND TECHNOLOGIES

Automation: n8n, Make, Zapier

AI: OpenAI and GPT-based integrations

CRM and Data: Salesforce, HubSpot, Zoho, Supabase, Airtable, Google Sheets

Development: JavaScript, TypeScript, REST APIs

Reporting: Excel, dashboards

Collaboration: Slack, Notion, ClickUp, Google Workspace

EDUCATION

MBA in Project Management – Kwara Business School

BSc in Physiology – University of Ilorin
